DG.PLUS

Rely on us!

DGPlus is the leading dangerous goods online web application which has been developed by JD Knowledge, specifically for companies handling dangerous goods. This service is aimed at correctness and efficiency, i.e. accuracy in reporting and time savings in case of checks. This application contains the actual legislation and provides you with the official documents to make your dangerous good shipment ready.

Better performance with lower costs. Just log in from every computer or mobile device and simply browse through the legislation you need, and print the official documents needed to transport a dangerous goods shipment.

JD Knowledge is also publisher of these law books.
Please contact us or check our website www.dg.plus to order these books.

We provide the following publications:

- ADR (Transport of dangerous goods by road)
- IMDG Code (Transport of dangerous goods by sea)
- ADN (Plus) (Transport of dangerous goods by inland waterways)
- RID (Transport of dangerous goods by railway)
- ICAO (Transport of dangerous goods by air)

Subscriptions

Effective, efficient, accurate and safe working with dangerous goods.
DGPlus is available in four different subscriptions; Bronze, Silver, Gold and Platinum. Bronze is the basic version and Platinum the most extended one.

Bronze

With this subscription you have access to the legislation. You can easily get an upgrade to the Silver, Gold or Platinum version.

Silver, Gold and Platinum

With these subscriptions you are able to generate your transport documents in company or check if a shipment is according to the 1000 points table, or carry out an online segregation check.

When you order an online subscription, please note that this is including one set of law books.
Except the basic version (Bronze).

With DGPlus you are able to:

- Check segregation of a shipment
- Calculate ADR Points
- Rename your own dangerous goods
- Print shipper labels
- Make your own shipment
- Generate the official transport documents (CMR / IMO / Shippers Declaration)
- Print tremcard labels

Webservice

In addition JD Knowledge also provides customized services. Data that have to accompany dangerous goods to external companies (like PSN, UN number, IMO class, packing group and flash point) can be tailored to your needs. JD Knowledge may supply any additional data, if so desired, as JD Knowledge manages its own database with all transport modes for dangerous goods in two languages.

If you have any questions, please don't hesitate to contact us.
